

SUSTAINABILITY PROMISE:

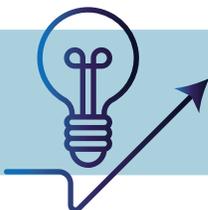

SOURCING RAW MATERIALS:

We source our raw materials from reliable reputable companies who uphold environmental, social and governance expectations and who strive to continue to innovate sustainable future chemical innovations.

SUSTAINABLE ZERO WASTE MANUFACTURING:

Nycote Laboratories Corporation prides itself on being a 100% zero waste chemical manufacturer by way of:

Planning and developing new innovative strategies to increase manufacturing efficiencies.

Participating in chemical recycling programs with extremely knowledgeable and reputable companies.

Carrying out the highest material and equipment standards to ensure optimal manufacturing performance standards are met.

Collecting high level data, analytics, and product samples to ensure accountability on every batch of our products.

SUSTAINABLE FUTURE:

Nycote Laboratories promises to produce next generation greener chemical products as future resources and technologies are introduced to our industry. Nycote earmarks reinvestment capital annually to obtain growth into new innovative green technologies.
